

Using Streams

```
switch ( event ) {  
    case NSStreamEventErrorOccurred:  
        [self postErrorNotification:[stream streamError]  
                                     forStream:stream];  
        self.complete = YES;  
        break;  
    ...  
}
```

Using Streams

```
switch ( event ) {  
    case NSStreamEventEndEncountered:  
        self.complete = YES;  
        [self handleDownloadedData];  
        break;  
    ...  
}
```
